

VGOB 89-0126-0009-91

The docket item was withdrawn. No order required. CNX asked the Board to authorize them to comply with a previous order submitted by EnerVest Operating, LLC, from the January 2017 VGOB Hearing, which authorizes CNX and other operators to allow increased density of two wells per unit. The Board verified that all operators are approved to do this type of transaction.
