

2026 Price Utah Day 1
Written Statement

Thank you for responding to our mine emergency.

You are located at the Fresh Air Base established in the 4 East Section.

The 4 East entries are numbered from left to right 1, 2 and 3. Fresh air is coming into the FAB from 1 entry and returns out 3 entry.

A Command Center has been established on the surface.

On the afternoon shift yesterday 3 miners were working in the section. None of them came out at shift change. We have had no contact with them. Attempts to go into the section were not possible because of conditions encountered just inby this area.

The EXHAUSTING mine fan on the surface is running, is guarded and cannot be reversed or turned off. All power into the mine is locked out.

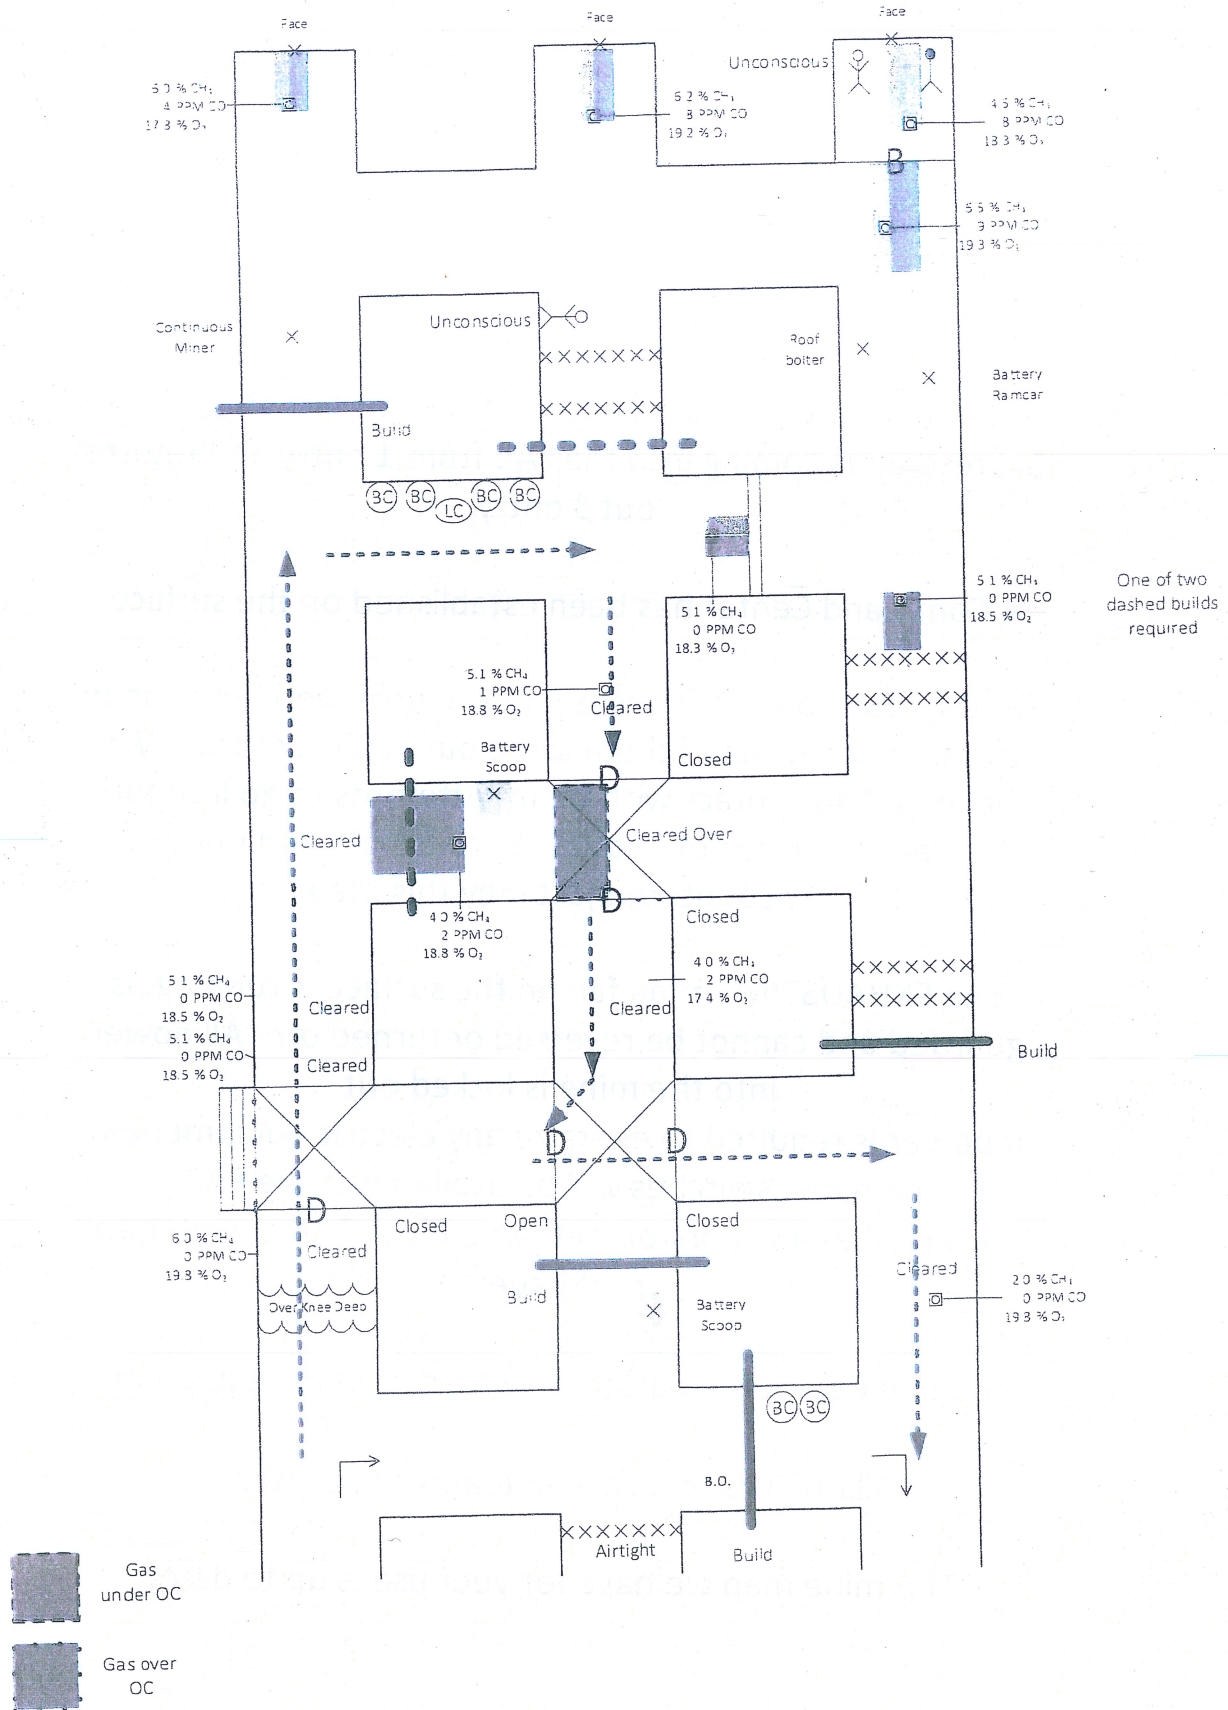

If power is required to energize any electric equipment in the mine, switches will be available at the FAB.

Our mine has a history of methane, Black Damp, water and roof issues.

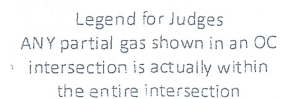

The mine uses some battery powered haulage equipment.

All officials and backup teams are present.

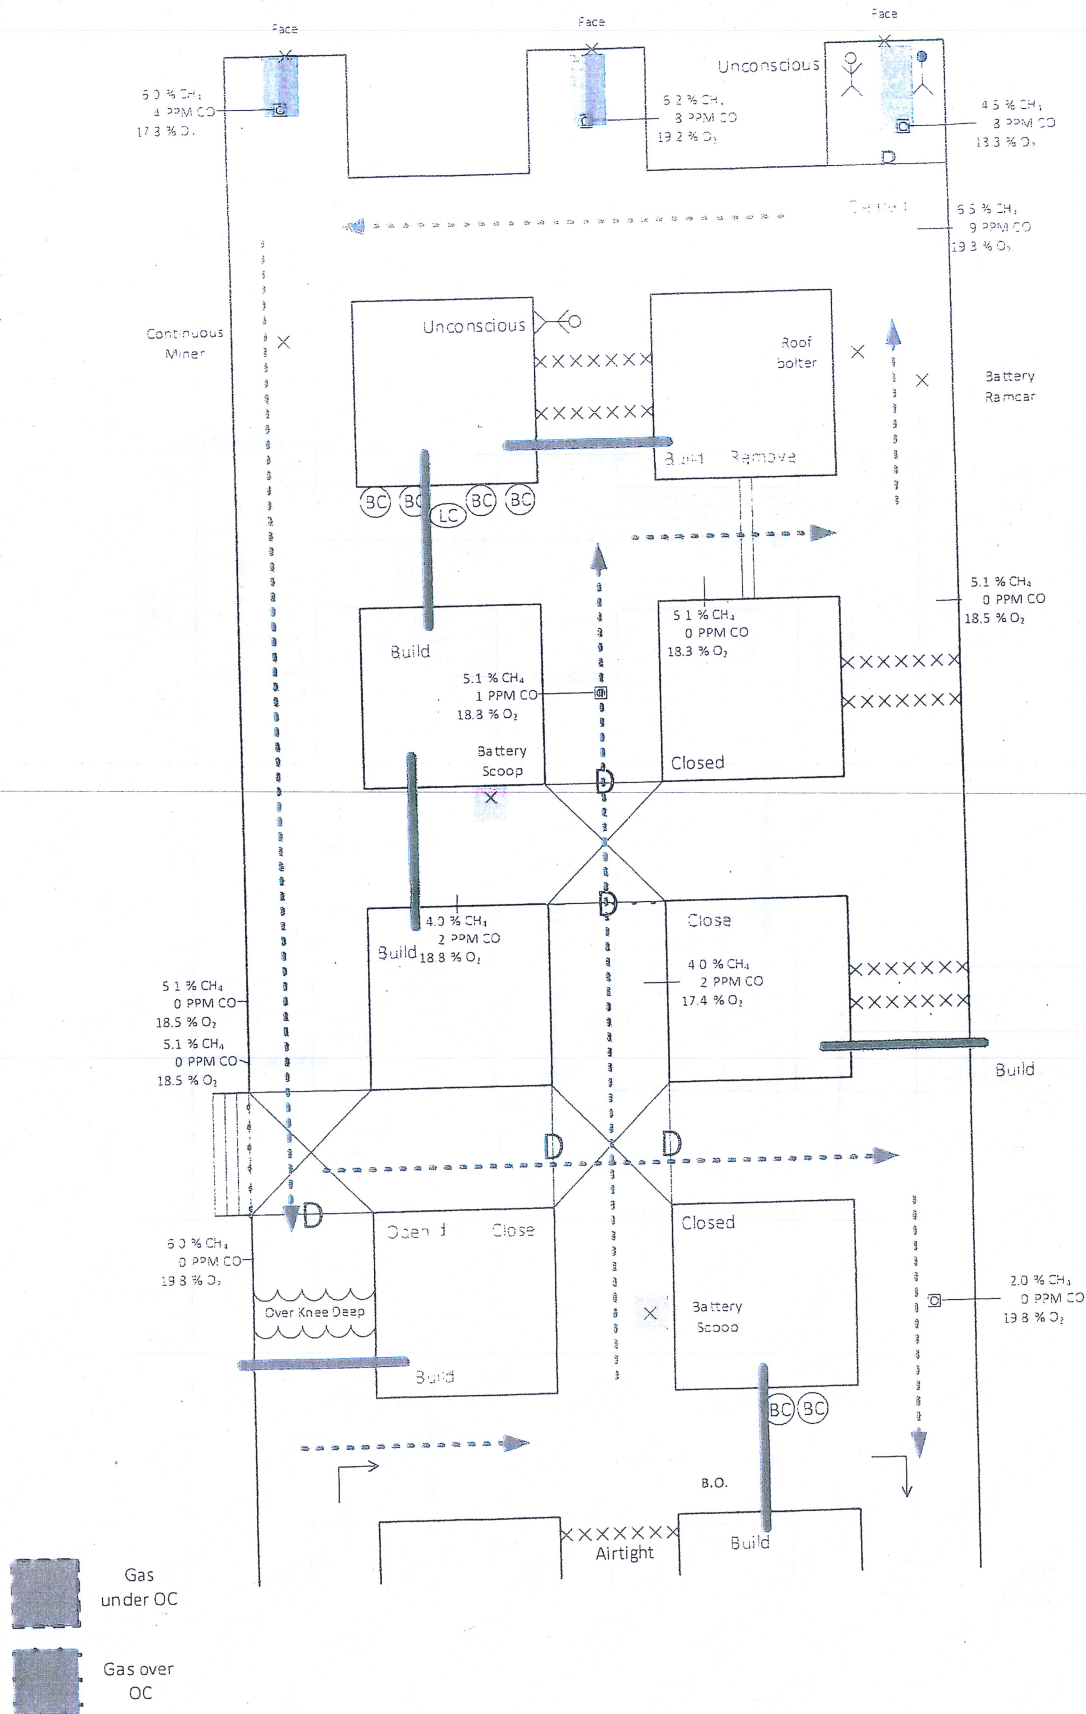

The mine map we have for your use is up to date.

Legend for Judges
ANY partial gas shown in an OC
intersection is actually within
the entire intersection
